	Plug-and-Play Computers for Assistive Technology Applications Plug-and-Play – Hardware (video card, processor, system resources) and system drivers are selected specifically for compatibility with current assistive technology. All computers provided by NanoPac are preloaded and tested and therefore setup at the consumer's site has been simplified. Any assistive software or hardware ordered through NanoPac will be installed, setup and tested prior to shipment. One point of support (NanoPac) eliminates "finger pointing" among multiple manufacturers as to who "owns" the problem.
